More than 10,000 successful projects are the best proof of long-term cooperation between OPTOTECH and MEAN WELL

Date: 2019.10.22

By: Marketing Center

Nicole@meanwell.com

Opto Tech Corporation (OPTOTECH), which is well-known in the international LED display market, chose to cooperate with MEAN WELL and use MEAN WELL's PSU since OPTOTECH first produced LED products more than 28 years ago. S.C. Chen, the vice president of OPTOTECH, contacted MEAN WELL from the very beginning because MEAN WELL was well-known for its reliability, and Mr. Chen knew the power supply is the core of the LED display, and MEAN WELL met OPTOTECH's strict requirements.

Due to OPTOTECH's extensive operations ranging from North to Central and South America, from over 2 decades of the test of time in extremely cold to very hot places, they create the LED displays with outstanding performance. From US billboards and sports stadiums, throughout the Americas, we can find OPTOTECH's products with MEAN WELL's PSU in more than 10,000 projects. Looking forward to the future, OPTOTECH will work with MEAN WELL to create more and better public spaces, so that everyone in the world can enjoy a beautiful lighting environment. We invited you to click on the client testimonial link above to learn more about the story.
